DETAILED ACTION

1. This application, previously suspended from prosecution due to an interference, is now subject to further prosecution because the previously cited interference has terminated.

2. The prior provisional rejection over count 1 of Interference No. 102,954 is withdrawn because the interference has terminated.

Double Patenting

3. Claims 14-26 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-13 of copending Application No. 07/973,107. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

4. Claims 14-26 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-13 of Patent No. 5,026,798. Although the conflicting claims are not identical, they are not patentably distinct from each other because, although they differ trivially in wording and scope, the two sets of claims define a substantially identical process for producing crystalline poly-alpha-olefins.

In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
